Minneapolis, Minnesota
For Immediate Release

Fresh Vine now supports Multiple locations, and Services

This release is major step for us. This release includes the last major building block modules we need to really start having a lot of fun in the coming year. These last two pieces are the Campus system (for multi-site support), and the Services module. They allow you to understand the trends and attendance for your weekly worship services. After setting up the services you will be able to attach giving to a particular service, and will automatically update the attendance as you log the giving information. These elements will continue to integrate more deeply into the system with future releases.

These pieces, along with the rest of the system, will allow us to have more fun pushing the limits of what a web based church management software can do.

The release notes for version 2.0: <http://status.freshvine.co/post/28729498199/version-2-0-concord-released>

About Fresh Vine:

Fresh Vine [<http://freshvine.co/>] is online ministry management software that fosters participation. It helps all members of the community to connect and get involved. It supports all ministry and small group activities, including membership, giving, child check-in, services, and ministry/group calendars, events, attendance, and emails. Use the power of Fresh Vine to nurture and grow your ministry.
