

21st December 2011
Minneapolis, Minnesota
For Immediate Release

Improve Groups and International address support

Focusing on improving your ability to understand and track your weekly services. You can now create Groups that are specified by type (basic, or class) to clarify their purpose. Class groups will also automatically create events to coincide with the services they are related to for attendance tracking and follow-up. Our much anticipated Check-In system is here, and utilizes our brand new API (in private Alpha release) for seamless integration with Fresh Vine.

In response to the rapidly growing interest in Fresh Vine we have also unified and upgraded our address system to handle addresses from everywhere on earth. We also are able to supply the same mapping and address correction for 71 of the 249 countries/districts.
