

8th August 2012  
Minneapolis, Minnesota  
For Immediate Release

**Craft your emails with ease, and watch your community open them**

Our email system has received a major face lift with this release. It is now easier than ever to communicate with your church - and we'll make sure you look good in the process. With a brand new drafting and template system, you can now filter the roster down, select a template and content layout and get writing.

After you send your message watch as people open the email in their inbox to know how quickly people are seeing your message! We even include social sharing features for your messages that are accessible from both Fresh Vine and when any user views a message online.

For release notes on version 2.2: <http://status.freshvine.co/post/28968554116/v2-2-released>

**About Fresh Vine:**

Fresh Vine [<http://freshvine.co/>] is online ministry management software that fosters participation. It helps all members of the community to connect and get involved. It supports all ministry and small group activities, including membership, giving, child check-in, services, and ministry/group calendars, events, attendance, and emails. Use the power of Fresh Vine to nurture and grow your ministry.
