For Immediate Release

Refining and Elevating Fresh Vine (v2.3)

This release refines and elevates what we already have built into Fresh Vine church management. The majority of the heavy lifting was behind the scenes in this release as we continue to prepare for our API to go public. The notable improvements are to members (three new classifications, improved relationship management, and better filtering), updates to the subscription management, and an overhauled settings screen. Other notable improvements and details are listed on our status blog: <http://status.freshvine.co/post/40273939167/version-2-3-released>

About Fresh Vine:

Fresh Vine [<http://freshvine.co/>] is online ministry management software that fosters participation. It helps all members of the community to connect and get involved. It supports all ministry and small group activities, including membership, giving, child check-in, services, and ministry/group calendars, events, attendance, and emails. Use the power of Fresh Vine to nurture and grow your ministry.
