Fresh Vine Showcased to over 700 Tech Leaders

On July 18, 2013 the Fresh Vine team presented our cutting edge ministry management software at 'minnedemo 14' hosted by Minnestar. The minnedemo is a semi-annual event that showcases real, working technology products made in Minnesota. Fresh Vine was one of seven organizations that were asked to present to over 700 people from the Minnesota technology community. Fresh Vine showcased our responsive, intuitive software by presenting several scenarios in how ministry leadership uses Fresh Vine to connect with their community. We received a great response to our demonstration and we told by many members of the audience that ours was the best presentation of the evening.

About Fresh Vine:

Fresh Vine [<http://freshvine.co/>] is online ministry management software that fosters participation. It helps all members of the community to connect and get involved. It supports all ministry and small group activities, including membership, giving, child check-in, services, and ministry/group calendars, events, attendance, and emails. Use the power of Fresh Vine to nurture and grow your ministry.

About Minnestar:

minne* [<http://minnestar.org/>] exists to bring together Minnesota's technology community. Our goal is to promote connections that help our community learn from each other, build their businesses, and start new entrepreneurial ventures. We aim to bridge the gap between software developers, designers, entrepreneurs, and investors.
